SYNOPSIS

SYNOPSIS

Personal Health and Wellness Tracker is an intuitive and user-friendly Python-based project designed to help individuals monitor, analyze, and improve their overall well-being. By tracking three key health indicators sleep hours, mood levels, and exercise minutes—this tool provides users with valuable insights into their daily routines and long-term habits.

Maintaining a balanced lifestyle is crucial for both mental and physical health, and this tracker serves as a personalized digital journal that helps users establish a structured approach to self-care.

Whether we trying to improve sleep quality, stabilize mood fluctuations, or maintain a consistent exercise routine, this project empowers users to make data-driven lifestyle adjustments for long-term wellness.

In today's fast-paced world, allowing individuals to document their daily activities in a structured way. By logging key health data consistently, users gain the opportunity to recognize patterns in their behavior, identify areas for improvement, and take actionable steps toward creating lasting wellness habits.
